PROFESSIONAL SUMMARY

Senior Software Engineer with nearly 3 years of enterprise experience at Capgemini supporting ANZ Bank in large -scale core banking systems. Strong expertise in COBOL, DB2, CICS, and JCL, with hands-on experience in mission-critical financial transaction processing and production support. Currently pursuing an MS in Information Systems at the University of Memphis, transitioning into AI, Data Analytics, and Cloud Engineering. Experienced in building end-to-end analytics and AI-driven systems using Python, Tableau, Power BI, and AWS, bridging legacy systems with modern data platforms.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, COBOL, C++, HTML5, CSS3

Data & Analytics: Data Analysis, Data Cleaning, ETL, Data Visualization, Business Intelligence, Statistical Modeling

BI Tools: Tableau, Power BI, SAS Viya, Excel, R / RStudio

AI / ML: Machine Learning, Predictive Modeling, Healthcare Analytics, AI Application Development

Mainframe & Enterprise: IBM z/OS, DB2, CICS, VSAM, JCL, Vision PLUS, REXX, TSO, ISPF

Cloud & Tools: AWS, Git, GitHub, Render, Replit, REST APIs, JIRA, ServiceNow, Control-M

PROFESSIONAL EXPERIENCE

Capgemini (Client: ANZ Bank)

Oct 2023 – July 2025

Senior Software Engineer

- Led Vision Plus enhancements for ANZ card systems supporting Mastercard and Visa processing in production.
- Owned SDLC for Schemes, TRAMS Upgrade and Control-M migration from requirements to production deployment.
- Resolved Vision Plus batch abends impacting millions of Mastercard/Visa transactions within SLA timelines.
- Managed Control-M scheduling for 100+ jobs ensuring reliable nightly card processing cycles.
- Mentored 4+ engineers on COBOL/DB2 and Vision Plus, improving delivery quality and reviews.

Capgemini

Dec 2022 – Oct 2023

Software Engineer

- Developed COBOL/DB2 applications for banking and Mastercard/Visa processing on IBM mainframe.
- Built and managed 80+ JCL batch jobs for stable enterprise workflow execution.
- Handled production support through debugging and batch failure resolution.
- Optimized DB2 queries improving performance across banking and card datasets.
- Delivered Agile SDLC enhancements across development, testing, and releases.

RESEARCH, DATA ANALYTICS & AI PROJECTS

CystaSense – PCOS Health Analytics & AI Deployment

Oct 2025 – Jan 2026 | *Python, GitHub, Render*

- Built Python-based PCOS analytics system generating predictive insights from clinical datasets.
- Developed end-to-end AI pipeline integrating APIs for automated data processing.
- Migrated system from Replit to GitHub for scalable version control and reproducibility.
- Deployed cloud application on Render enabling real-time healthcare insights.
- Presented research at Fogelman Research Colloquium, University of Memphis.

Adidas Retail Analysis & Predictive Modeling

Nov 2025 – Dec 2025 | *SAS Viya, Tableau, Excel*

- Built predictive model achieves 93% accuracy on 9,600+ retail transactions.
- Analyzed customer behavior and sales trends using statistical methods.
- Developed dashboards in Tableau and SAS Viya for business insights.

Credit Card Complaints Dashboard

Sep 2025 – Oct 2025 | *Tableau*

- Built Tableau dashboards analyzing complaints across 50 U.S. states.
- Created KPI visualizations for financial trend monitoring.
- Converted regulatory data into actionable insights.

Additional Projects: COBOL Web Integration, Netflix Dashboard (R Shiny), JavaScript Game, Client Websites.

EDUCATION

University of Memphis

GPA: 3.66

Master of Science in Information Systems

Expected May 2027

Relevant Coursework: Machine Learning, Data Analytics, Healthcare Analytics, Business Intelligence Systems

RECOGNITIONS

- 2025 Student Staff Tiger Award Nominee, University of Memphis
- 2022 Campus Placement Award, Sri Mittapalli Institute of Technology
- 2020 Top Student Award — ETV Plus “Student No. 1”, Sri Mittapalli Institute of Technology for Women
- 2017 Academic Excellence Scholarship, PBN College
